InSync® for Db2 Related Data

Training Course Synopsis

CONFIDENTIAL

InSync® for Db2 Related Data

Course Overview

This two-hour course provides an introduction to using InSync® for working with related data in Db2.

Each topic in the course consists of an explanation of its concepts followed by a demonstration of the pertinent screens. Course notes will be provided to support the course.

Course Objectives

On successful completion of the workshop, students will be able to:

- Define InSync® relationships
- Use InSync® relationships to drive related extracts, related deletes and related loads
- Explain the need for related deletes

Course Topics

Recap of browsing and editing Db2 related data

Defining InSync® relationships for Db2

Db2 related extract

Db2 related delete

Db2 related load

Target Audience

The course is intended for people who need to extract and load related Db2 data, either in a database administration role or an application development role.

Course Prerequisites

- Students should be familiar with using InSync® for Db2 and the Macro 4 course 'Working with InSync®' which provides the necessary level of understanding.
- Students should be familiar with Db2 related data.
- No pre-reading is required but participants can visit the Macro 4 website at http://www.macro4.com for a general introduction to the company and its products.

Location

Courses are usually run at a customer site but alternative arrangements are also possible by prior arrangement.
